SC1.1.3 Industry thresholds

- (1) There are no industry thresholds for the planning scheme.

SC1.2 Administrative definitions

- (1) Administrative definitions assist with the interpretation of the planning scheme but do not have a specific land use meaning.
- (2) A term listed in table SC1.2.b column 1 has the meaning set out beside that term in column 2 under the heading.
- (3) The administrative definitions listed here are the definitions for the purposes of the planning scheme.

Table SC1.2.a Index of administrative definitions

Access easement	Net developable area
AEP	Netserv plan
Adjoining premises	Non-resident workers
Advertising device	Non urban areas
Affordable housing	Outermost projection
Average width	Planning assumptions
Base date	Projection area(s)
Boundary clearance	Plot ratio
Building height	Secondary dwelling
Building location envelope	Service catchment
Coastal dependent development	Setback
Demand unit	Site
Development footprint	Site cover
Domestic outbuilding	Storey
Dwelling	Structure plan
Gross floor area	Temporary use
Ground level	Ultimate development
Household	Urban areas
Minor building work	Urban purpose
Minor electricity infrastructure	

Table SC1.2.b Administrative definitions

Column 1 Term	Column 2 Definition
Access easement	A form of title that permit access across one lot to provide access to another lot.
AEP	Annual Exceedance Probability
Adjoining premises	Premises that share all or part of a measurable common boundary.
Advertising device	Any permanent structure, device, sign or the like intended for advertising purposes. It includes any framework, supporting structure or building feature that is provided exclusively or mainly as part of the advertisement.
Affordable housing	Housing that is appropriate to the needs of households with low to moderate incomes.
Average width	In regard to a lot, the distance between the midpoints of the side boundaries of the lot.
Base date	The date from which a local government has estimated its projected infrastructure demands and costs.
Basement	A storey substantially below ground level where no part of the floor level projects more than one metre above ground level.
Boundary clearance	The shortest distance from the outermost projection of a structural part of the building or structure to the property boundary, including: (a) if the projection is a roof and there is a fascia—the outside face of the fascia; or (b) if the projection is a roof and there is no fascia—the roof structure. The term does not include rainwater fittings or ornamental or architectural attachments.
Building height	The vertical distance between the ground level and the highest point of the building roof (apex) or parapet at any point but not including non-load bearing antenna, aerial, chimney, flagpole or the like.
Building location envelope	A defined area within a lot within which development (usually building work) can occur.
Coastal dependent development	Development that requires access to tidal waters to function. Typically, coastal dependent development consists of uses such as ports, harbours and navigation channels, public jetties, aquaculture involving marine species, desalination plants, tidal generators and beach nourishment. Residential development, in any form, is not coastal dependent development.
Demand unit	Demand units provide a standard of unit measurement to express demand on a trunk infrastructure network.
Development footprint	The location and extent of all development proposed on a site. This includes all buildings and structures, open space, all associated facilities, landscaping, on-site stormwater drainage, on-site wastewater treatment, all areas of disturbance, on-site parking, access and manoeuvring areas.

Column 1 Term	Column 2 Definition
Domestic outbuilding	A Class 10a building, as defined in the Building Code of Australia, that is ancillary to a residential use on the same premises and is limited to non-habitable buildings for the purpose of a shed, garage and carport.
Dwelling	<p>A building or part of a building used or capable of being used as a self-contained residence that must include the following:</p> <ul style="list-style-type: none"> (a) food preparation facilities; (b) a bath or shower; (c) a toilet and wash basin; (d) clothes washing facilities. <p>This term includes outbuildings, structures and works normally associated with a dwelling.</p>
Gross floor area	<p>The total floor area of all storeys of a building (measured from the outside of the external walls or the centre of a common wall), other than areas used for the following:</p> <ul style="list-style-type: none"> (a) building services, plant and equipment; (b) access between levels; (c) ground floor public lobby; (d) a mall; (e) the parking, loading and manoeuvring of motor vehicles; (f) unenclosed private balconies whether roofed or not.
Ground level	<p>The:</p> <ul style="list-style-type: none"> (a) level of the natural ground; or (b) the ground level of the lot on the day the first plan of survey identifying the lot was registered; or (c) where the level of the natural ground has been changed, the level as lawfully changed.
Household	An individual or a group of two or more related or unrelated people who reside in the dwelling, with the common intention to live together on a long-term basis and who make common provision for food or other essentials for living. The term does not include individuals living in rooming accommodation.
Minor building work	An alteration, addition or extension to an existing building where the floor area, including balconies, is less than five per cent of the building or 50 square metres, whichever is the lesser.
Minor electricity infrastructure	<p>All aspects of development for an electricity supply network as defined under the <i>Electricity Act 1994</i>, (or for private electricity works that form an extension of, or provide service connections to properties from the network), if the network operates at standard voltages up to and including 66kV.</p> <p>This includes:</p> <ul style="list-style-type: none"> (a) augmentations/upgrades to existing powerlines where the voltage of the infrastructure does not increase; (b) augmentations to existing substations (including communication facilities for controlling works as defined under the <i>Electricity Act 1994</i>) where the voltage of the infrastructure does not increase, and where they are located on an existing substation lot.

Column 1 Term	Column 2 Definition
Net developable area	The area of land available for development. It does not include land that cannot be developed due to constraints such as acid sulfate soils, conservation land, flood affected land or steep slope. Note—for the purpose of a priority infrastructure plan, net developable area is usually measured in hectares, net developable hectares (net dev ha).
Netserv plan	A distributor-retailer's plan about its water and wastewater networks and provision of water service and wastewater service pursuant to section 99BJ of the <i>South East Queensland Water (Distribution and Retail Restructuring) Act 2009</i> .
Non-resident workers	Workers who reside in areas for extended periods when employed on projects directly associated with resource extraction, major industry, major infrastructure or rural uses, but have a permanent place of residence in another area. This includes workers engaged in fly-in/fly-out or drive-in/drive-out arrangements.
Non urban areas	Areas broadly included within a Rural zone, Environmental management zone or a Conservation zone.
Outermost projection	The outermost projection of any part of a building or structure including, in the case of a roof, the outside face of the fascia, or the roof structure where there is no fascia, or attached sunhoods or the like, but does not include retractable blinds, fixed screens, rainwater fittings, or ornamental attachments.
Planning assumptions	Assumptions about the type, scale, location and timing of future growth.
Plot ratio	The ratio of gross floor area to the area of the site.
Projection area(s)	Area or areas within a local government for which a local government carries out demand growth projections.
Secondary dwelling	A dwelling used in conjunction with, and subordinate to, a dwelling house on the same lot. A secondary dwelling may be constructed under a dwelling house, be attached to a dwelling house or be free standing.
Service catchment	An area serviced by an infrastructure network. An infrastructure network is made up of one or more service catchments. Service catchments are determined by the network type and how it has been designed to operate and provide service to the urban areas. Note—for example: <ul style="list-style-type: none"> • stormwater network service catchments can be delineated to align with watershed boundaries • open space network service catchment can be determined using local government accessibility standards • water network service catchment can be established as the area serviced by a particular reservoir.
Setback	For a building or structure, the shortest distance measured horizontally from the outer most projection of a building or structure to the vertical projection of the boundary of the lot.
Site	Any land on which development is carried out or is proposed to be carried out whether such land comprises the whole or part of one lot or more than one lot if each of such lots is contiguous.

Column 1 Term	Column 2 Definition
Site cover	<p>The proportion of the site covered by a building(s), structure(s) attached to the building(s) and carport(s), calculated to the outer most projections of the building(s) and expressed as a percentage.</p> <p>The term does not include:</p> <p>(a) any structure or part thereof included in a landscaped open space area such as a gazebo or shade structure;</p> <p>(b) basement car parking areas located wholly below ground level.</p>
Storey	<p>A space within a building which is situated between one floor level and the floor level next above, or if there is no floor above, the ceiling or roof above, but not:</p> <p>(a) a space that contains only:</p> <ul style="list-style-type: none"> – a lift shaft, stairway or meter room; or – a bathroom, shower room laundry, water closet, or other sanitary compartment; or – accommodation intended for not more than three vehicles; or – a combination of the above; <p>(b) a mezzanine.</p> <p>Note—definition from the <i>Building Code of Australia</i>.</p>
Structure plan	<p>A plan prepared to support a proposal to subdivide land that demonstrates how the proposed development will integrate with existing or planned development on surrounding lots and providing a conceptual understanding of the intended mix and arrangement of future land uses within the site.</p>
Temporary use	<p>A use that is impermanent and may be irregular or infrequent that does not require the construction of a permanent building or the installation of permanent infrastructure or services.</p> <p>Note—provisions for temporary use timeframes for defined uses may be provided within section 1.7 Local government administrative matters.</p>
Ultimate development	<p>The realistic extent of development anticipated to be achieved when a site (or projection area or infrastructure service catchment) is fully developed.</p>
Urban areas	<p>Areas generally supplied with the full range of urban services.</p>
Urban purpose	<p>For the purpose of priority infrastructure plans, urban purposes includes residential (other than rural residential), retail, commercial, industrial, community and government related purposes.</p>
